Your Way to

Be a Killer

Poker Player.

Dear Poker Friend,

There are 2 reasons to play Poker.

It's social. Or it's money. Pleasure. Or Business.

Either you like to sit down with a group of Poker buddies and enjoy the game. Share some jokes. Drink some beers.

Or you like to sit down with some guys you can turn over. And do just that.

It's either/or.

And if you want to sit around and chatter, wile away an evening, eat tortilla chips and then head off home to bed, only to do the same thing again next week, that's your choice.

If that's you, though...let me save you some time.

WHY DON'T YOU STOP READING RIGHT HERE?

Because to be interested in what I've got to show you you'll need to be the other kind of player.

The kind who plays to win.

The kind that I (like most people, I suppose) am always fascinated by.

The kind we always notice.

Because while many, many people play for the supposed "fun of it", Poker isn't a "for the fun of it game".

It's a game for winners.

WHY DO SO FEW PLAYERS KNOW HOW TO WIN?

The truth is that despite what they claim, MOST Poker players want to win more than anything else.

They want to win for the satisfaction of caning their friends.

They want to win for the money they could take off their friends.

Even more so, they want to win for the money they could make by walking into a casino and sitting down with real players, decent players, and walking away winners.

But most players will NEVER be in that position.

Why?

Because most Poker players lack Killer strategies.

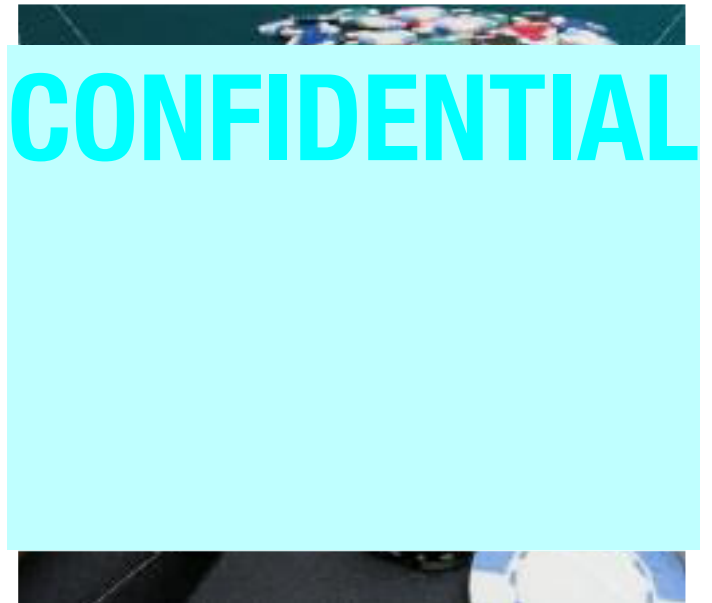

I've spoken to some of the best players now playing Poker in the UK, and they all say the same thing.

Most players have very little idea what they're doing!

Some players have NO idea what they're doing.

"They walk into a game with their cash hanging out their pockets and sit down and act tough. Try to look like they know what they're doing," one VERY SUCCESSFUL player told me recently. "Pros like me can see them coming. You don't even have to be very good to take their money."

THE BEST ADVICE.

I like to listen to people who know what they're doing.

And I like people who are winners.

There's something about success.

I've been very interested in the surge in popularity of Poker in the last couple of years.

I've watched it going crazy online.

And I've watched it going mad in private games and casinos all over Britain.

And I have to admit I've got more than a little interested in what it is that makes a few people WINNERS with LOTS of money, and leaves most of the others going home at the end of the game with no cash, and no smile on their face.

'KILLER POKER TACTICS'.

I'm not going to beat around the bush.

I know when I have something good to offer.

And I know at this moment that what I'm able to offer you in this letter is VERY good.

How do I know?

Because I've had a dozen highly experienced Poker players try it out...and within 2 days every single one of them came back to me to say so.

WILL WHAT I HAVE TO OFFER HELP YOU IMPROVE YOUR POKER?

You bet it will.

WILL IT HELP YOU TAKE CONTROL AT THE TABLE?

You bet it will.

CONFIDENTIAL

WILL IT HELP YOU WALK AWAY WITH EVERYONE ELSE'S MONEY IN YOUR POCKET...OR WITH THE CASINO OR POKER SITE'S MONEY IN YOUR POCKET?

Yes. Yes. And Yes.

If you want to learn Killer Poker Tactics, don't start off looking in Britain.

Don't ask me why.

There are some pretty decent players here in Britain. (Not many, but certainly a few.)

But if you want real Poker Heroes...lone guns who can walk into a casino and walk out with BIG MONEY at the end of the night...you have to look to the US.

Maybe it's Vegas. Maybe it's all those smoke-filled back rooms. I don't know what it is, but America produces Poker players with the kind of ruthless, calculating minds that no player in Britain can lay claim to.

Players who started out playing aged 7.

Players who will play 20 or 22 hours at a stretch.

Players who calculate odds, and study strategy faster and harder than computers.

FINDING A REAL WINNER.

8 months ago, I started out determined to find a masterclass in ruthless Poker tactics.

During those 8 months, I've spoken to every Poker specialist, and every Poker publishing house in the US.

I told them all the same thing.

I wanted a book...or a DVD, or something that would show smart, ordinary Poker players how to turn themselves into WINNERS.

I didn't want a "How to Play" guide. There are loads of those.

What I wanted was 'HOW TO WIN'.

YOUR OPPORTUNITY TO BE A WINNER.

'Killer Poker Tactics' is not a book, and it isn't a DVD.

It's an astonishing one on one interview with a 19 year old Californian Physics student who is now recognised as one of the cruelest, most calculating and **SUCCESSFUL** Poker players to happen along in a generation.

Daniel Koeitzman's secrets, tips and strategies will make YOU a better player.

And whichever Poker game you play, this is stuff you can put right to work and start winning bigtime.

(If you play Texas Hold 'Em, like so many players do now, then EVERY word Koeitzman says will be instantly applicable to you.)

In his first year of playing (and it's not even legal to enter a casino in the US under the age of 19) he's taken himself from zero to winning over \$25,000!

(He's a student, don't forget, so he's not playing in games with huge stakes.)

How?

With a mix of mathematical knowledge and clever strategies based on REAL HARD FACT.

Remember Daniel Koeitzman's name.

He's about to make you a fortune.

'KILLER POKER TACTICS'. LEARN TO LULL OPPONENTS INTO FEEDING YOU THEIR MONEY.

Daniel Koeitzman is exceptional. His Poker brain is remarkable.

Maybe it's his physicist's mind.

Maybe it's his skill at learning.

Maybe it's just something he was born with.

Whatever it is...you better hope you never find yourself up against Daniel at the table.

The place to find yourself with Daniel is in the quiet of your own home or car, with your headphones on, listening to the 3 valuable CDs that make up 'Killer Poker Tactics'.

On this 3-part recording, Koeitzman goes head to head with committed Poker journalist Randy Charach.

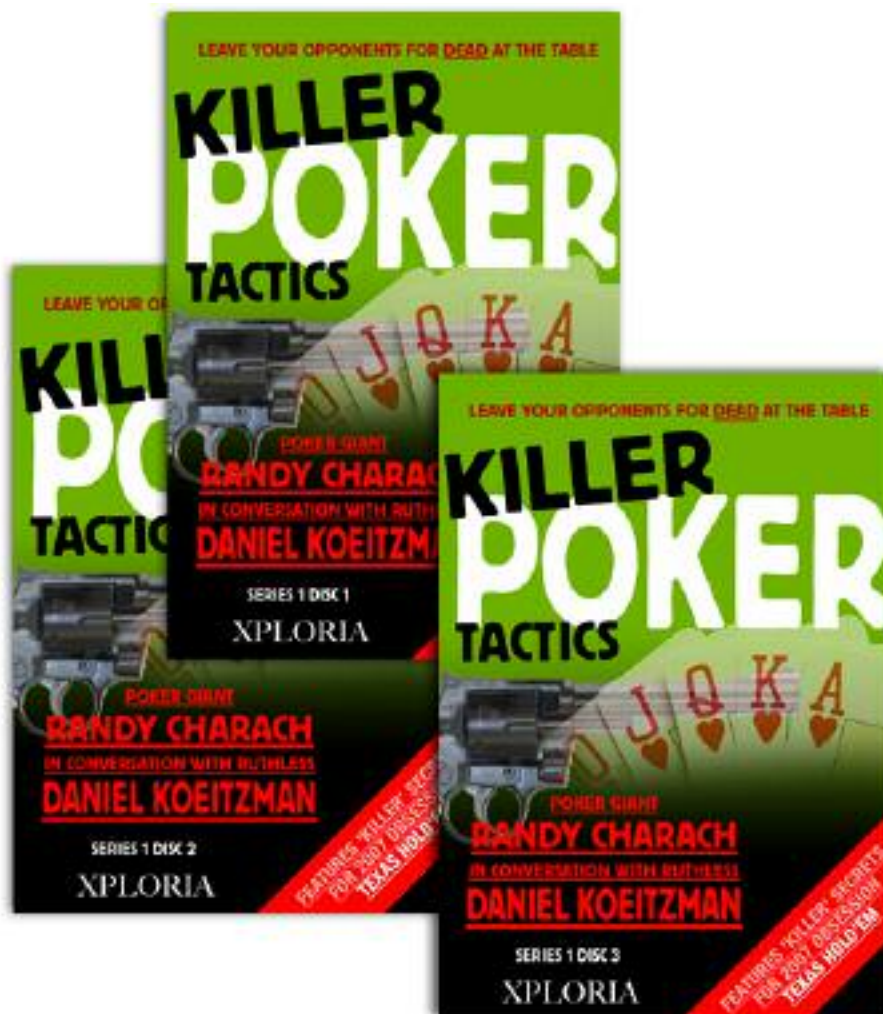

He doesn't pull punches.

He explains WHY most people play so badly.

(YES! HE'S TALKING ABOUT YOU!)

And he explains his own methodologies and strategies for playing, winning, getting up and walking out with your wallet **bulging**.

LISTEN TO THE INTERVIEWS. LEARN FROM DANIEL KOEITZMAN'S KILLER TACTICS.

● **Killer Tactics on Basic Thinking**

You think being a winner is about luck, or about skill? Koeitzman's a physicist. Hear what he has to say from a scientific point of view.

Or find out what he thinks about your bankroll - the money you set aside to play Poker with, and about choosing the stakes you play. And what are you like on odds? Koeitzman's 100% clear on the things good players and bad players do and don't know about odds. And where's the best place to sit? Or is there NO best place to sit?

● **Killer Tactics on Money Management**

Do you just dip into your pocket when you want to play Poker? You think that's what the winners do? How do you decide exactly how much to sit down at the table with? And how do you know, over time, how you're doing? You work on gut feel? You think THAT'S how winners

do it? The great thing is, YOU don't have to be a genius to do what Daniel Koeitzman does. You just have to hear him explain what he does and why he does it, then copy him.

● **Killer Tactics on Tilts and Rushes**

Your state of mind is everything when you play Poker to win. And Koeitzman tells you how to handle both extremes - when things are going badly, and when they're going well. In both cases, it's how you handle yourself at those times that makes you a winner or a loser.

Killer Tactics on Betting

● Betting is the place that Killer Tactics come into their own. After all....betting is how you make it....or lose it. Koeitzman's no-nonsense approach debunks the nonsense lots of players carry around in their head and shows you what to do and, just as important...WHAT NOT TO DO.

Killer Tactics on Bluffing

● You do it the right way, for the right reasons, you're a Killer. Do it the wrong way - at the wrong time or too often - you're just a loser. Daniel explains Killer bluffing insights and strategies to send you home with the pot in your pocket every time.

Killer Tactics on Pot Odds

● You might not be a physicist yourself, like Dan Koeitzman, but the maths isn't any harder than backing a horse. Daniel explains in detail how to understand and use pot odds in your game to tighten up your playing strategy based on maths...not on guesswork.

Killer Tactics on Playing the Player

● Everyone likes to think they're good at reading their opponents, but the TRUTH is that most people are far from good. Koeitzman's mix of natural observancy and cool, studied psychology is part of what makes him such a formidable opponent. His ideas and strategies will give your 'player playing' Killer edge, too.

Final Thoughts on Killer Tactics

● You'll be wishing Daniel Koeitzman and Randy Charach would chat on for ever. By now, you'll have learned so many things to sharpen up your approach and your game that you'll be trying to figure how you can get to meet Daniel yourself and have private tutoring. Bad news
